Conditions before any customer invoice

- 1 Provider keys live only in Railway secret storage.
- 2 One inbound call from a real phone is written to the ledger.
- 3 Stripe price id for \$0.35 is the one the app reports.
- 4 Balance at zero pauses the line.
- 5 Kenny accepts the first staging call before a customer number is ported.

Risks

- Vendor price changes compress the 75 percent gross. The customer rate does not auto-follow.
- Support time is not in the minute cost. Ten noisy accounts can erase the illustration.
- Canadian anti-spam rules block unsolicited commercial email. The outreach module does not send.
- A shared Stripe key with another project is allowed only if the webhook is Meridian's own.
- This document is not legal, tax, or securities advice.
